

Juan Diego Cortes Barbosa

Junior Software Developer (Frontend)

juandicortes07@gmail.com — (+57) 3507427337

Professional Summary

Software Analysis and Development Technologist, recently graduated, with a strong focus on frontend development and a great interest in continuously improving my skills across different areas of software development. I stand out for building modern, responsive, and user-focused interfaces while working with current web technologies and development best practices.

I have foundational knowledge in both frontend and backend development through academic and personal projects, where I have contributed to web application development, feature integration, and the design of scalable and functional interfaces. I adapt quickly to new environments, learn technologies efficiently, and collaborate effectively within development teams to achieve project goals.

I am proactive, committed, and open to learning whatever is required by the company or project, with a strong motivation to continue growing professionally and contribute valuable solutions within software development teams.

Professional Experience

Development Intern - Intergraficas S.A

2025 – 2026

- Participated in the development and maintenance of web applications using Python with Django for backend functionality and business logic implementation.
- Developed dynamic and responsive frontend interfaces using React, focused on improving user experience and platform interaction.
- Worked with Strapi as a headless CMS for content management, integrating services and APIs between frontend and backend systems.
- Collaborated on API integrations and service consumption for communication between different system modules.
- Assisted in bug fixing, feature validation, and continuous application improvements within the development workflow.
- Worked collaboratively with the development team using agile methodologies and programming best practices.
